

PRIYANSHU R BHAGAT

AI/ML Engineering • Software Engineering • Backend Development

Bengaluru, India • +91 9172622276 • priyanshu0152@gmail.com

<https://www.linkedin.com/in/priyanshu-r-bhagat> • <https://github.com/priyanshu015211>

SUMMARY

Third-year AI/ML Engineering student who has shipped 4 production-style ML and full-stack applications, including a forecasting platform achieving $R^2 = 0.969$ and a sensor-based activity classifier at 97.11% accuracy. Builds end-to-end with Python, FastAPI, React, and PostgreSQL, and is an active open-source contributor with 30+ repositories and 500+ commits. Seeking an AI/ML or Software Engineering internship to bring the same build-and-ship execution to a product team.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning

BMS Institute of Technology and Management, Bengaluru

Expected 2028

CGPA: 8.6 / 10

Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, OOP, Natural Language Processing, Database Management Systems

TECHNICAL SKILLS

Languages: Python, C, C++, SQL

Frameworks & Libraries: FastAPI, TensorFlow, Scikit-learn, React, Streamlit, Pandas, NumPy, Matplotlib

Databases: PostgreSQL, MySQL

Developer Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook, Vercel, Render

Core Concepts: Machine Learning, Time Series Forecasting, Feature Engineering, Model Evaluation, REST APIs, OOP, DSA, DBMS, NLP

PROJECTS

UAC Capacity Monitor Dashboard | Python, Streamlit, Scikit-learn

2026

github.com/priyanshu015211 • [priyanshu-uac-capacity-monitor.streamlit.app](#)

- Developed as part of a Machine Learning Internship at Unified Mentor Pvt. Ltd. (Mar–Jun 2026).
- Built an end-to-end healthcare analytics platform processing 1,075+ days of operational data from the U.S. HHS Unaccompanied Children Program.
- Engineered time-series features and trained a Random Forest model achieving $R^2 = 0.969$ on unseen data, automating 30-, 60-, and 90-day demand forecasting.
- Deployed 10+ interactive dashboards on Streamlit Cloud with real-time KPIs, anomaly detection, and executive-level reporting.

AI Developer Career Intelligence Platform | React, Tailwind CSS, FastAPI, PostgreSQL, OpenAI API

2026 – Present

github.com/priyanshu015211

- Engineering an AI-powered platform that evaluates GitHub repositories to generate developer skill insights, career-readiness scores, and personalized learning recommendations.
- Designed a modular FastAPI backend with endpoints for repository ingestion, NLP-based skill extraction, and personalized role recommendations.
- Integrated the GitHub and OpenAI APIs to automate repository summarization, technology detection, and skill-gap analysis, with React + Tailwind dashboards for growth metrics.

AegisCare | React, FastAPI, PostgreSQL, Python, Matplotlib

2025

github.com/priyanshu015211/AegisCare • github.com/priyanshu015211/AegisCare-2.0

- Developed an AI-powered healthcare platform improving accessibility through intelligent patient assistance and healthcare management.
- Implemented RESTful APIs enabling seamless communication between a responsive, accessibility-focused React frontend and backend healthcare modules.
- Designed the application with a modular architecture to simplify future AI feature integration and improve maintainability.

Human Activity Recognition from Mobile Health Sensor Data | Python, Scikit-learn, Pandas

2025

github.com/priyanshu015211/human-behavior-classification

- Developed a wearable sensor-based human activity recognition model achieving 97.11% classification accuracy.
- Evaluated KNN, Decision Tree, and Logistic Regression models using feature scaling and hyperparameter tuning.
- Applied feature normalization and exploratory data analysis to improve model accuracy and generalization.

OPEN SOURCE

- Maintains 30+ public GitHub repositories with 500+ commits across AI, backend engineering, machine learning, and healthcare analytics projects.
- Contributes using Git-based workflows, documentation, issue tracking, and collaborative software development practices.

ACHIEVEMENTS

- Finalist, Samsung ANVESHANA Solve for Tomorrow National Ideathon.

CERTIFICATIONS

- DeepLearning.AI — Machine Learning Specialization
- Deloitte Data Analytics Virtual Job Simulation — Forage
- Data Analysis with Python — Simplilearn

Target Roles: AI/ML Engineering Intern, Software Engineering Intern | **Availability:** Immediately available, remote or Bengaluru-based
